Oyster opal

Through the transition of acrylic suppliers, the oyster opal had slightly changed to a darker version of the traditional colour with gold specks. The colour formula has been modified and now the oyster opal is much closer to the traditional, more popular colour. Please note that all oyster opal orders will reflect this change.

Owners manuals location

Moving forward all owners manuals will be located in the cabinet area. Previously the manual and other documents were located in the filter. This change will take place effective immediately and will be standardized across all brands.

New California Cooperage models

More innovations in the California Cooperage line: the new models C281, C280, C270 and C170 are being introduced. The California Cooperage 107 has been discontinued and replaced with the 281. Model 281 is an enhanced version of the 107, making this spa even more appealing at a greater value. The jet count has been increased to 43 and the 281 comes standard with the Star Package. This model complements the 280 nicely, rounding out the California Cooperage family. Please note the stereo on the 281 will be the same as the rest of the new California Cooperage models. The stereo on the 107 had a sub-woofer whereas the new ones do not. The new pricelist reflects this change, as you will see a drop in price on the stereo option. Please contact Françoise at fvansanten@maaxspas.eu for new pricelists. Please find underneath the specifications:
