

New C-Quel Infrared Cabins

Interhiva has added a new line of Infrared Cabins to its product range. With input from our customers and our own experiences in the Infrared Cabin business, we developed the cabins with features such as Red Cedar, mirror glass, lower back emitter, starry sky fibre optics and MP3 sound system as standard fittings. To introduce what we think is the ultimate Infrared Cabin in its class.

Technical changes on the MAAX product line

On a rolling basis the Filter Intake of MAAX Spas models 351 up to 781 will change to a Grill assembly. Further to that the height of the 480, 481, 482, 780 and 781 will increase with 3 inches (7.5 cm) by adding height to the footwell area. The frame and panels of the spas will increase in height, leaving all other aspects of the tub the same. Please check with Francoise @ fvsanten@interhiva.nl if your current spa orders or future spa order will be in the new configuration.
