

And the winner is....

The jury has had a hard time because all the photos that competed for the first price were very good. But this one stood out! So that's why we can announce that Sauna World Switzerland is the winner of the MAAX Spas Photo Contest 2011 and will receive a digital camera!

Reminder of technical changes on the MAAX product line

On a rolling basis the Filter Intake of MAAX Spas 351 up to 781 has been changed to a Grill assembly. Furthermore the height of the 480, 481, 482, 780 and 781 will increase with 3 inches (7.5 cm) by adding height to the footwell area. The frame and panels of the spas will increase in height, leaving all other aspects of the tub the same. All spas ordered from the 20th of June will be in the new configuration. Not sure if your spas on order are in the new configuration?

Please contact Françoise @ fvansanten@interhiva.nl to find out.
